Acknowledgments	v
Introduction	1
0.0. Aim	1
0.1. Subsidiary Stresses	1
0.2. Organization	5

Part I Data

Chapter 1: Subsidiary Stress Data of English Words	8
1.0. Introduction	8
1.1. Variant Pronunciations	9
1.1.1. Kenyon and Knott (1953)	9
1.1.2. <i>RH</i> (1987)	11
1.1.3. <i>WN</i> (1988)	12
1.1.4. Wells (1990)	15
1.1.5. <i>AH</i> (1992)	15
1.2. Preferred Variants	17
1.2.1. Entry Count	18

1.2.2. Validity of the Method.....	22
1.3. Summary	25
Chapter 2: Data Reliability of Subsidiary Stress in English Words	27
2.0. Introduction	27
2.1. New Method Capable of Describing Variants.....	27
2.2. Leading Type 1, 2, 3 Variants.....	30
2.3. Strong Type 4 Variant and Weak Type 5 Variant.....	33
2.4. Reversed Strong Type 4 Variant and Reversed Weak Type 5 Variant.....	36
2.5. Strong Type 6 Variant	43
2.6. Dominance Level and Variant Type	44
2.7. Summary	47
 Part II Previous Studies 	
Chapter 3: Subsidiary Stresses of English in Halle and Vergnaud (1987a)	50
3.0. Introduction	50
3.1. Tertiary Stress.....	50
3.1.1. Tertiary Stress in the <i>Hàlicárnássus</i> Type	50
3.1.2. Tertiary Stress in the <i>ânticipatòry</i> Type.....	54
3.1.3. Tertiary Stress in <i>bândána</i> in Contrast with <i>banána</i>	56
3.2. Stress Enhancement	64
3.3. Lexical Treatment: Difference in Word-Internal Structures	69
3.4. Summary	72
 Chapter 4: Subsidiary Stresses in Halle and Kenstowicz (1991)	75
4.0. Introduction	75
4.1. Rules with Noncyclic “Left to Right” Parsing	75
4.2. No Consideration of Syllable Structure and Previous Stress	78
4.3. Noncyclic HSR-2.....	80
4.4. Noncyclic HSR-2 with a “Non-Default” Setting	82

4.5. Noncyclic SCR with a “Non-Default” Setting.....	85
4.6. The <i>àlènation</i> Type	86
4.7. Initial, Onsetless Syllable: The <i>Apòllinàris</i> Type	88
4.8. Summary	89
Chapter 5: Treatment of English Stress by Idsardi (1992)	91
5.0. Introduction	91
5.1. Latin Stress Rule.....	91
5.2. Circumscription with Residue Deletion	94
5.3. Without Conflation.....	99
5.4. Lexical Edge.....	103
5.4.1. <i>originàlité</i> : A Case of Lexical Edge:LRL	103
5.4.2. <i>pègrinàtion</i> : A Case of Lexical Edge:LLL	105
5.4.3. <i>Hàlicàrnàssus</i> : A Case of Lexical Edge:RRR	106
5.4.4. Three Types of Lexical Edge.....	108
5.5. Tertiary Stress.....	114
5.6. Summary	115
Chapter 6: Stress Checking by Well-Formedness Conditions	117
6.0. Introduction	117
6.1. Overview	118
6.2. Stress Checking by Well-Formedness Conditions	119
6.2.1. Rightmost Feet	120
6.2.2. Non-Rightmost Feet.....	123
6.3. Summary	133
Chapter 7: Optimality Theory Analysis of English Subsidiary Stresses	135
7.0. Introduction	135
7.1. Complete Disregard of a Tertiary Stressed Pattern.....	136
7.2. Lexical Accent.....	137
7.3. Treatment of Words with Cyclic Behavior	139
7.4. Summary	150

Chapter 8: Lexical Treatment in Optimality Theory	151
8.0. Introduction	151
8.1. The Constraint FAITH (v^0).....	152
8.2. The Constraint BASE-IDENTITY.....	156
8.3. The Superconstraint [F(v^0)&BE].....	161
8.4. Non-Rightmost Stress Pattern.....	164
8.5. Summary	166

Chapter 9: Tertiary Stress and Opacity in English	167
9.0. Introduction	167
9.1. Treatment of Tertiary Stress	168
9.1.1. The Treatment in MT.....	168
9.1.2. The Treatment in OT	170
9.2. Existence of Tertiary Stress	174
9.3. Opacity	177
9.4. Summary	179

Part III Proposal

Chapter 10: Positional Function Theory	182
10.0. Proposal: Positional Function Theory	182
10.1. Setting.....	182
10.2. Basic Concept.....	185
10.2.1. Positional Function <i>Farness</i>	185
10.2.2. Positional Function <i>Heaviness</i>	187
10.2.3. Positional Function <i>Trace</i>	188
10.2.4. Positional Function <i>Binarity</i>	190
10.2.5. Summary of Basic Concept.....	193
10.3. Nature of Positional Functions	194
10.3.1. Positional Function <i>Rhythm</i> (Preliminary).....	194
10.3.2. Positional Function <i>Alveolar Consonant Sequence</i> (Preliminary).....	197
10.3.3. Intrinsic vs. Relative Positional Functions.....	200

10.3.3.1. Intrinsic Positional Functions: <i>Heaviness, Trace, Binariness</i>	200
10.3.3.2. Relative Positional Functions: <i>Farness, ACS, Rhythm</i>	202
10.3.3.2.1. More on Relative Positional Function: <i>Rhythm</i>	204
10.3.3.2.2. More on Relative Positional Functions: <i>Farness</i> and <i>ACS</i>	206
10.3.3.2.3. Verification and Refinement of <i>ACS</i>	209
10.3.4. Summary of the Nature of Positional Functions	221
10.4. Other Positional Functions	222
10.4.1. Positional Functions: <i>Velar-Alveolar Sequence (VAS)</i> and <i>Bare Nucleus Avoidance (BNA)</i>	222
10.4.1.1. Relative Positional Function <i>VAS: èxpèctàtion</i>	223
10.4.1.2. Negative Intrinsic Positional Function <i>BNA: èlèctrician</i>	225
10.4.1.2.1. Lexically Tense Vowels and <i>BNA: A Variant èlèctrician</i>	228
10.4.1.2.2. Lexically Tense Vowels and <i>BNA: Àlexànder</i>	230
10.4.1.2.3. Lexically Tense Vowels and <i>BNA: àffèctàtion</i>	232
10.4.1.3. Summary of <i>VAS, BNA</i> , and Lexically Tense Vowels	234
10.4.2. Relative Positional Function: <i>Edge Exemption (EE)</i>	235
10.4.2.1. Relative Positional Function: <i>Edge Exemption I (EE-I)</i>	235
10.4.2.2. Relative Positional Function: <i>Edge Exemption II (EE-II)</i>	240
10.4.2.3. Summary of <i>EE-I, EE-II</i> , and Prohibition against Double Application	247
10.4.3. Relative Positional Function: <i>Double Stop (DS)</i> and Non- Superimposition	248
10.4.3.1. Relative Positional Function: <i>Double Stop (DS)</i>	248
10.4.3.2. Non-Superimposition	251
10.4.3.3. Summary of <i>DS</i> and Non-Superimposition	254
10.4.4. <i>Category Selection Process (CSP)</i> in the Lexicon and an Account of Variants	255

10.4.4.1. Relative Positional Function: <i>Category Selection (CS)</i> : <i>pigmentation, importation</i>	255
10.4.4.2. Primary and Secondary Categories and <i>CSP</i> : <i>transportation</i>	262
10.4.4.3. Variant Pronunciations	269
10.4.4.4. Summary of the <i>CSP</i> in the Lexicon and an Account of Variants	277
10.4.5. <i>Free Binarity (FB)</i> with Optionality, and Lexical Stress ..	278
10.4.5.1. <i>Free Binarity (FB)</i> and Optionality.....	278
10.4.5.2. Lexical Stress	281
10.4.5.3. Summary of <i>FB</i> and Lexical Stress	284
10.4.6. Positional Adjustment Functions and Verification	284
10.4.6.1. <i>Rhythmic Adjustment (RA)</i>	286
10.4.6.2. <i>Stress Reduction (SR)</i>	291
10.4.6.3. <i>Sole Stress Resistance (SSR)</i>	293
10.4.6.4. Verification	296
10.4.6.5. Summary of Positional Adjustment Functions and Verification	298
10.5. Summary	299
Conclusions	303
Appendix: Postulated Positional Functions and Conditions	305
Bibliography	309
Index	319
